KOMMVIA™

Connecting Businesses™

Telecom Consulting

ASSESSMENTS / AUDITS / PLANNING / COORDINATION

Before you replace equipment or commit to a provider, get a clear picture of what you have and what you need. We turn field findings into a practical plan.

SITE WALKS & SYSTEM ASSESSMENTS

- Phone system & infrastructure review
- Existing equipment & connection inventory
- Cabling, rack & network condition checks
- Business needs & operational pain points
- Findings & prioritized recommendations

TELECOM AUDITS & LINE REVIEW

- Phone line & service inventory
- Carrier bill & service review
- Unused or duplicate service identification
- Analog line & connected device review
- Provider questions & change recommendations

SYSTEM SELECTION & ROADMAPS

- Hosted VoIP & on-premise system evaluation
- Legacy PBX replacement planning
- Cabling & network upgrade priorities
- Office expansion & relocation planning
- Phased scope & budget planning

PROJECT & PROVIDER COORDINATION

- Carrier & equipment vendor coordination
- Cutover requirements & schedule planning
- Buildout & contractor coordination
- Testing & commissioning plan development
- Documentation & handoff requirements

PRACTICAL ADVICE FROM THE FIELD

Business owners • General contractors • Property managers • Facility teams
We connect the equipment, cabling, carrier services, and daily workflow to help you decide what needs attention now, what can wait, and how to move forward.

FAST MEANS NOW

Start with a site walk and leave with a clear plan for your next step.
